

Purchasing Policy

Sustainable tourism and protection of the environment, the negative impact our business has on the environment, the environment in which we live, to contribute to the development of society is our top priority when shopping.

The products, which are purchased from our company are of high quality and comply with the law, beyond local products are selected.

Purchased services meet high quality and meet legal requirements and are sourced from local suppliers.

During the execution of our business performance, the effects can be reduced to the environment by the time of the purchasing process is minimized, price, quality and suitability will be assessed at the same time taking into account the following criteria, products and services are therefore not only the purchase price but also on the cost of the environment rated:

- There are products selected, which have a low energy consumption
- There are devices preferably having a low water consumption
- Are chosen products and services that produce little waste
- Choice of the least umwelschadlichen materials
- Close contact with our suppliers, the awareness is maintained on the supply of sustainable products and services.
